John Kennedy

As the conference comes to a close, join international speaker, strategist and author John Kennedy as he helps you create a road map for 2022. John's process for change management and

execution focuses upon three key principles---Vision, Values and Volition. What does success look like, what values do we have to guide us towards success, and what willingness do we have to achieve it? When you can answer those three questions, John will then introduce a wonderful tool to help drive your game plan into 2022 and beyond!
